

## Modular lantern

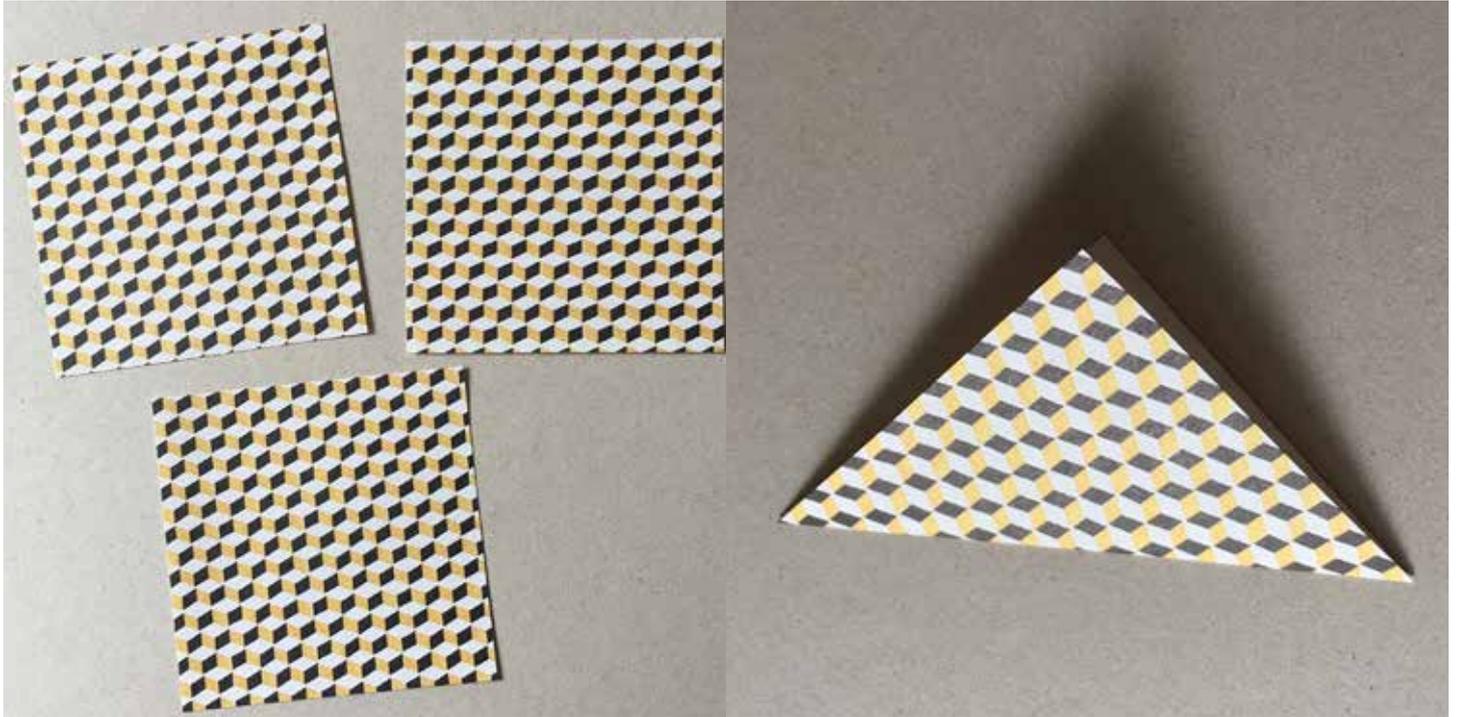

### What do you need

3 sheets of origami square paper. Recommended size 9 cm x 9 cm.

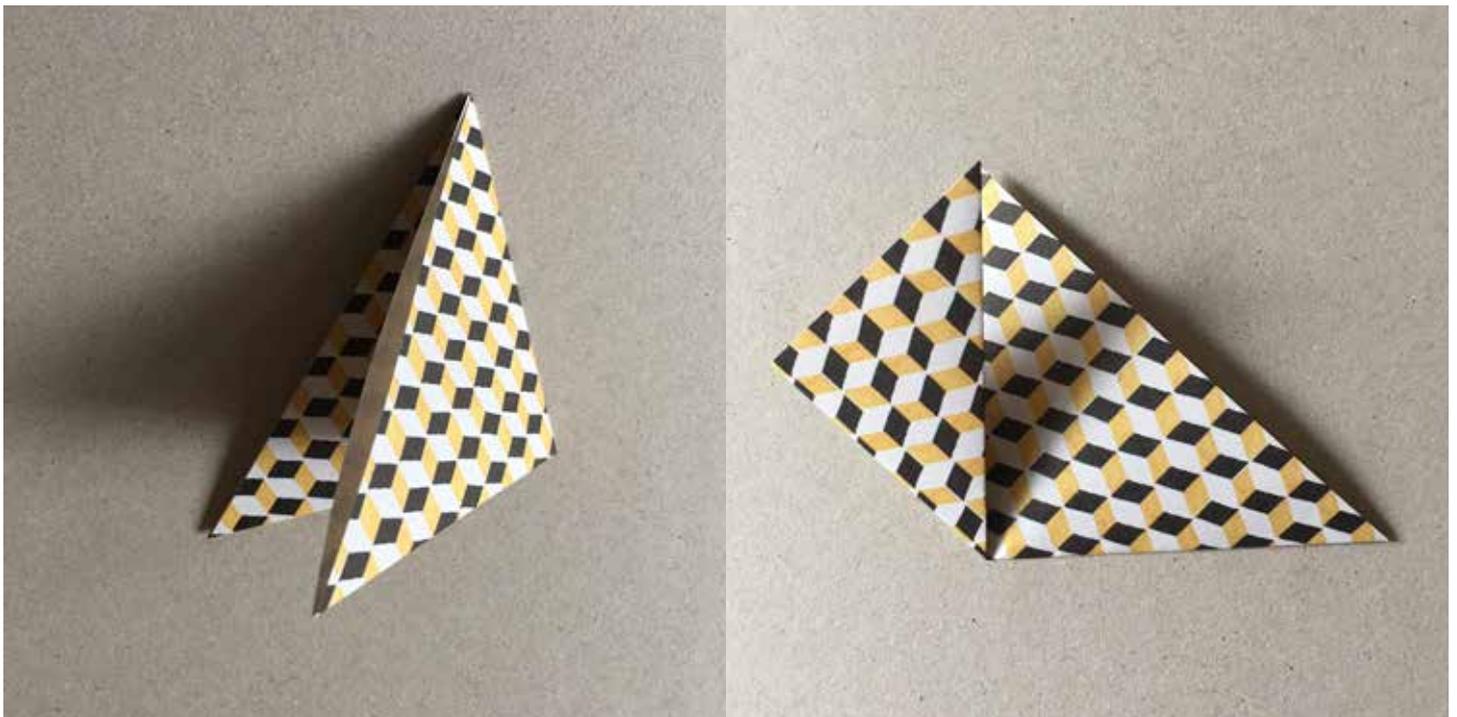

### How to make a modular lantern

It is recommended to use translucent paper to make paper lanterns. This model can also be used as a gift box, but for that purpose sturdier paper is recommended.

1. Gather 3 sheets of square paper of the same size.
2. Fold a piece of square paper in half, diagonally, printed side down, in order to make a triangle.

3. Fold it in half again and unfold to the previous position.
4. Fold the bottom left and right tips to meet the centre.

5. Repeat the previous steps with the other 2 sheets.

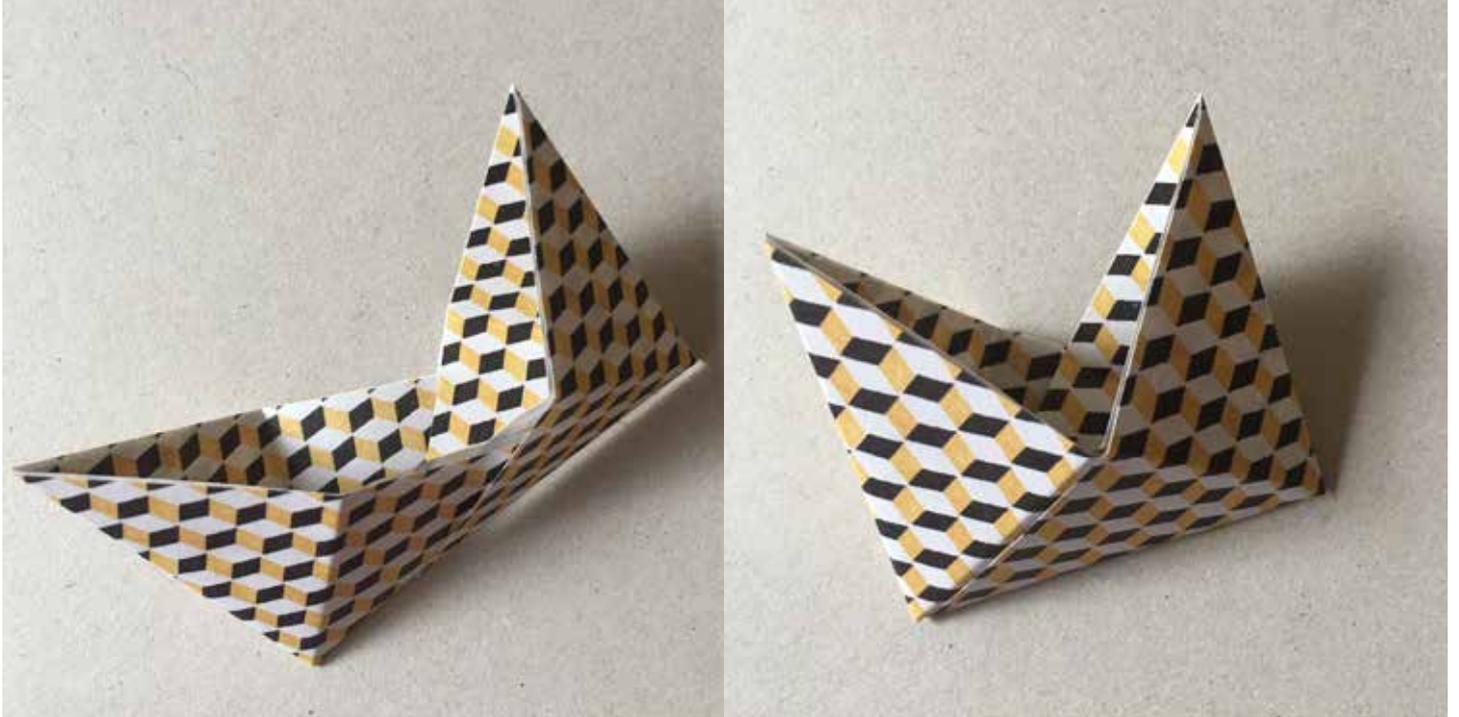

### Assembling the lantern

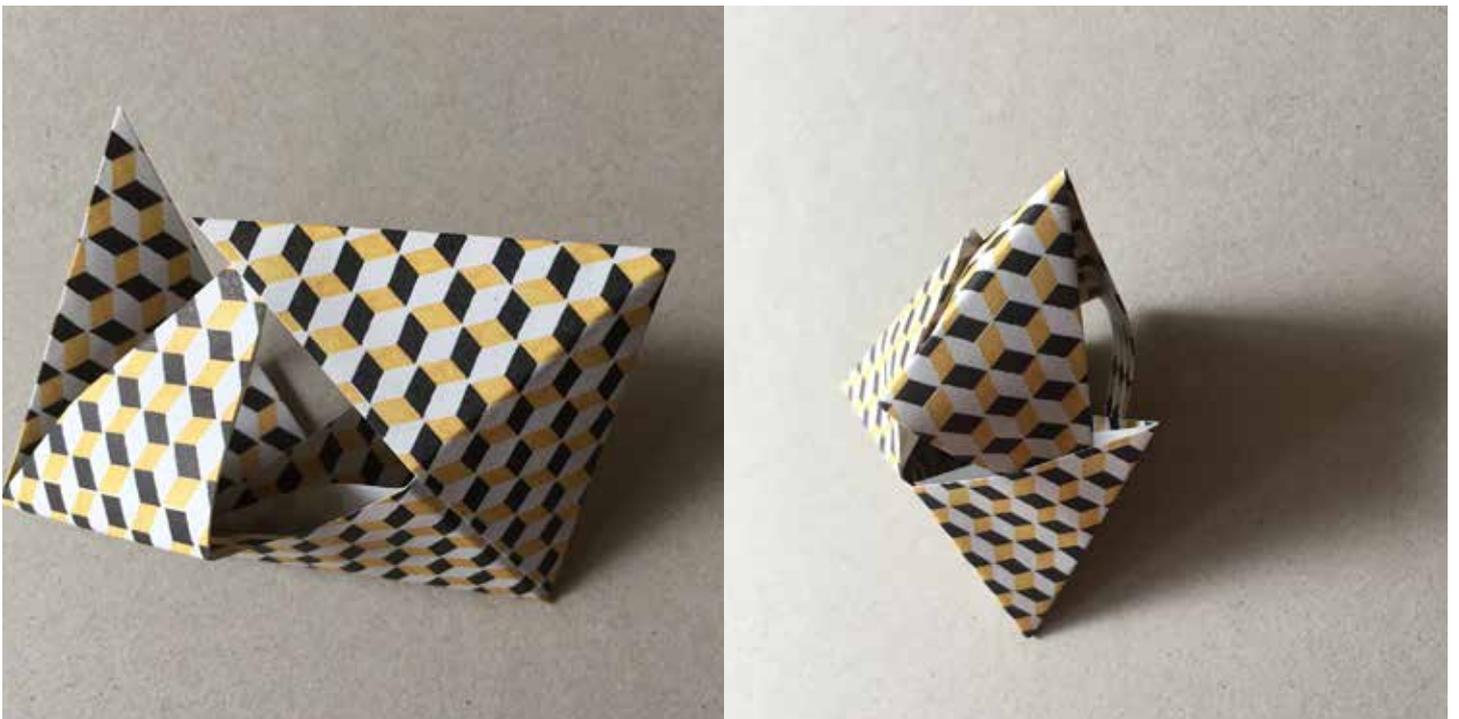

6. Open up to the 2nd fold (step 3) and re-crease well the centre fold.

7. Pick up two of the modules and insert the tips of the first unit into the pockets of the second unit.

8. Insert the third one's tail into the first one's pocket. Insert the tips of the third module into the second one's pocket.

9. Push them together slowly, making the model 3-dimensional.
