

Bell

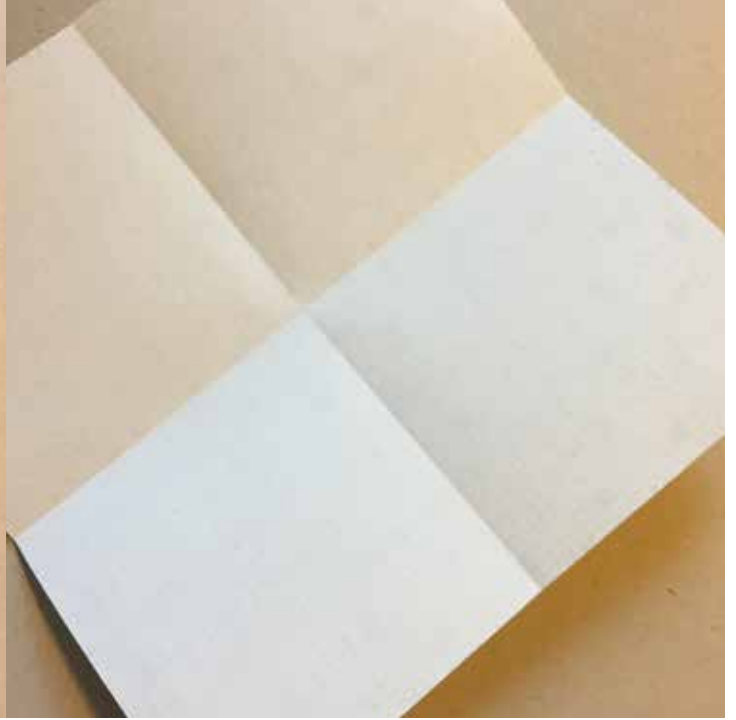

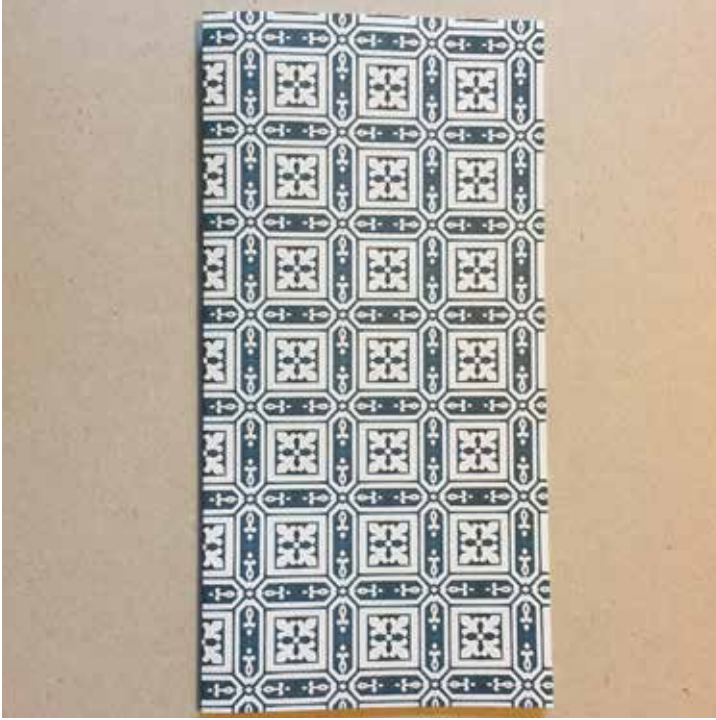

What do you need

1 sheet of origami paper of 15 cm x 15 cm. This object calls for a sturdier paper, 100-120 gsm.

How to make a bell

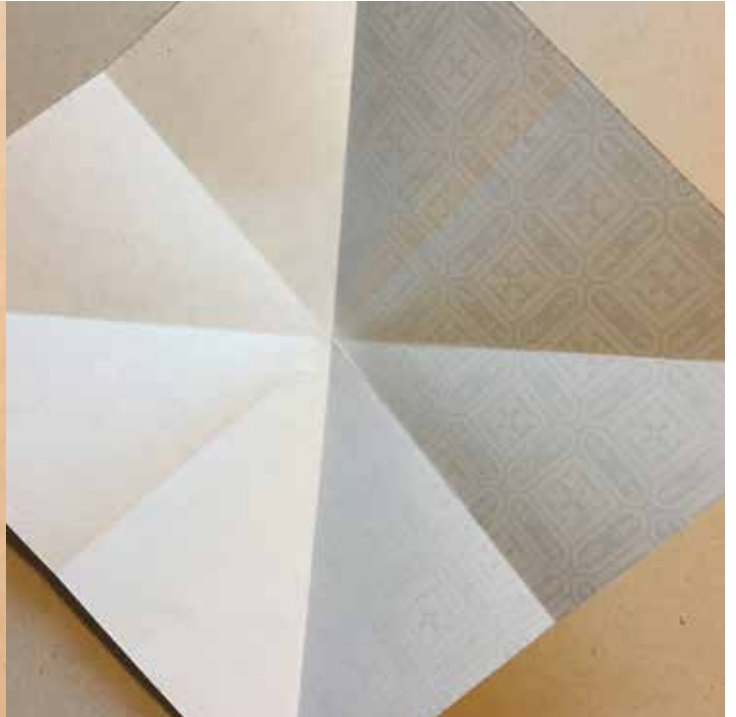

1. Fold a piece of square paper in half into a rectangle.

2. Unfold, turn paper 90 degrees and fold in half again.

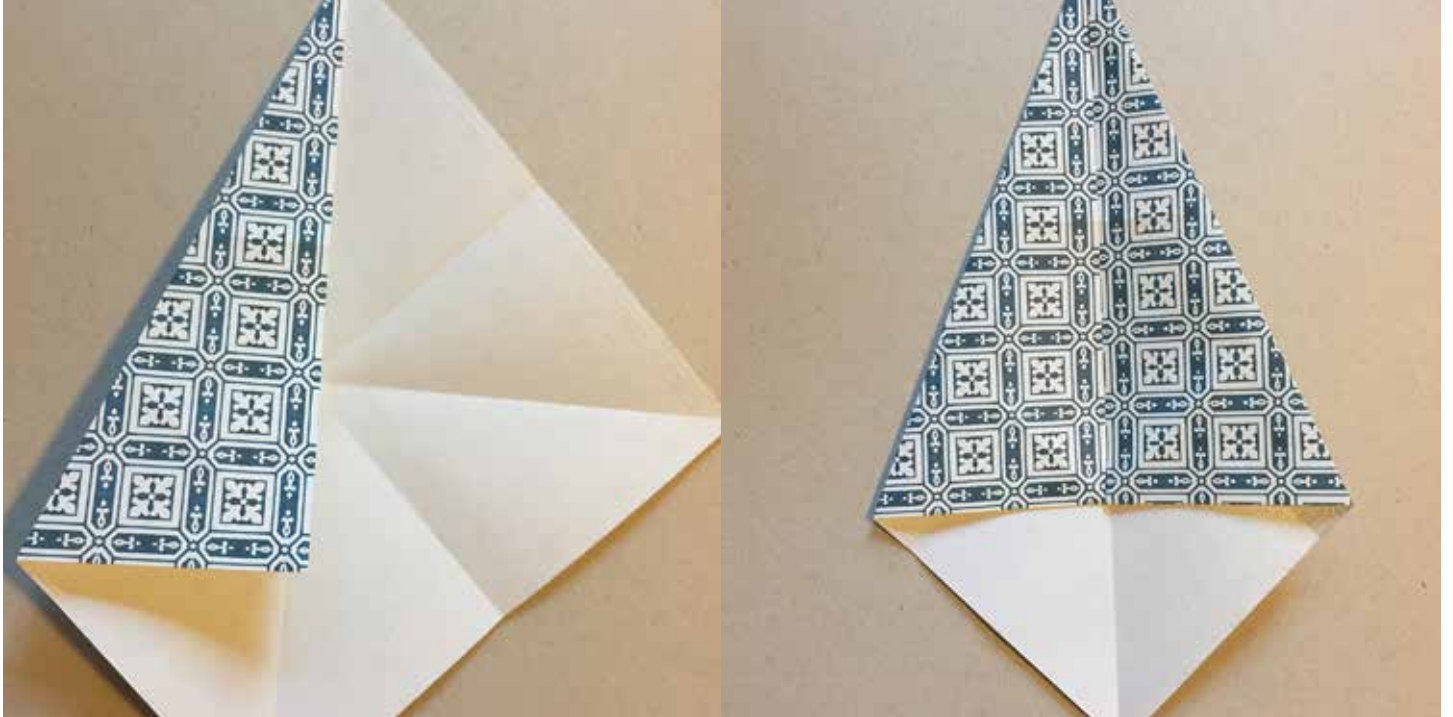

3. Open the square and fold it diagonally.

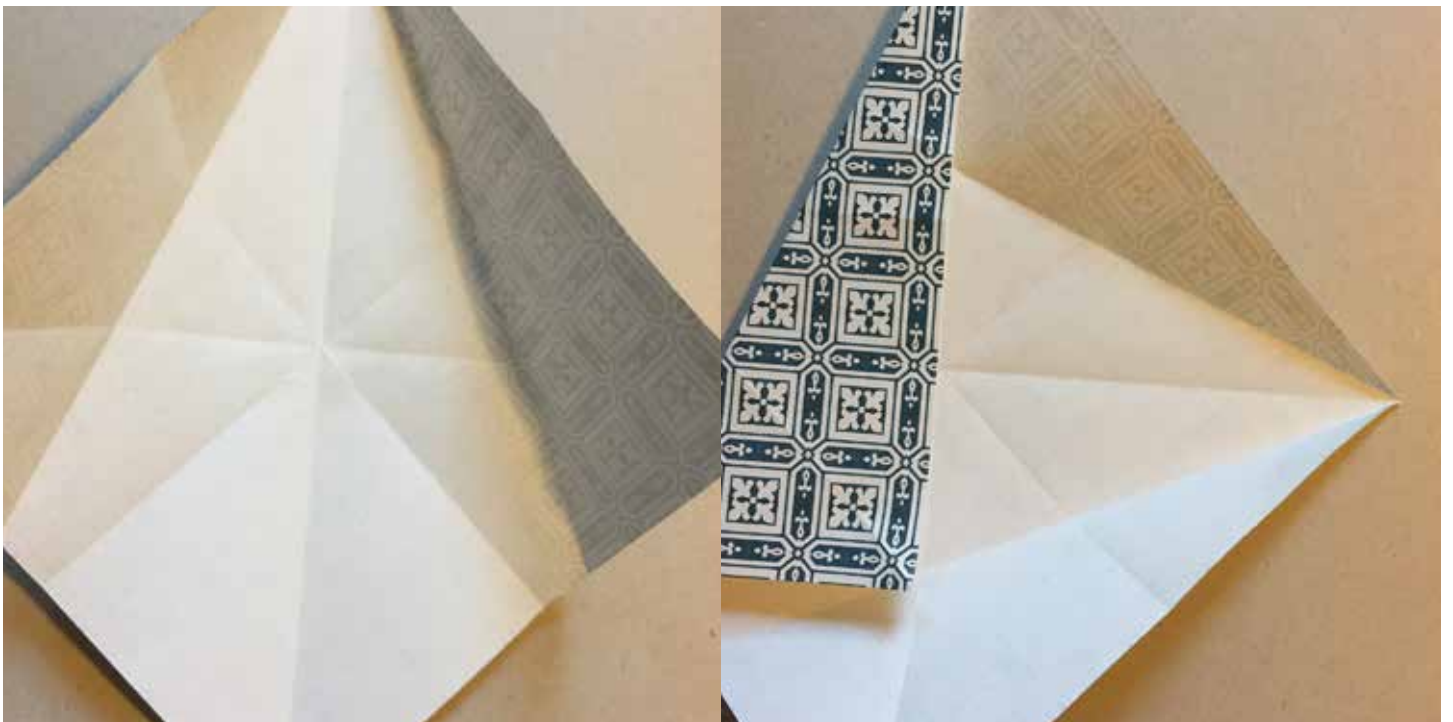

4. Open and fold the opposite diagonal.

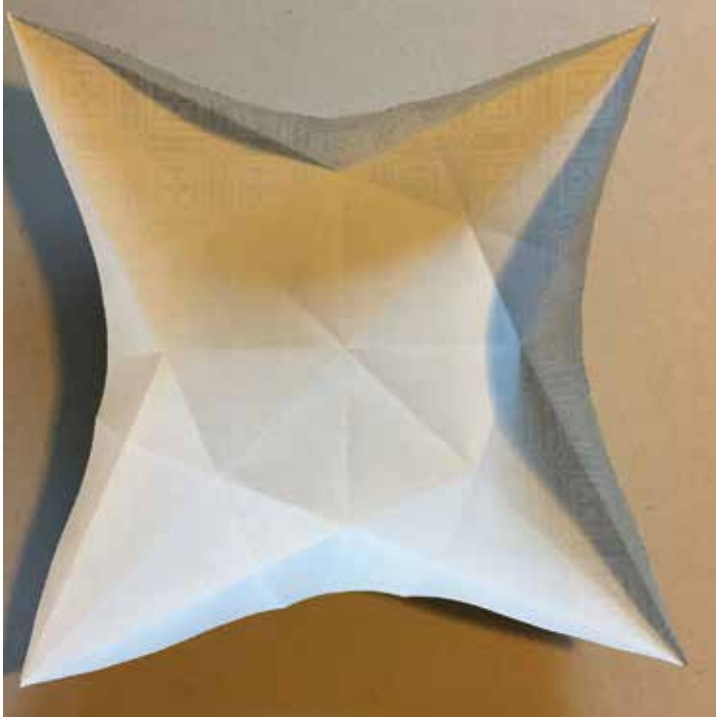

5. Open and make an airplane fold at each corner by bringing the paper on each side to the centre.

6. Open and repeat with the airplane folds with the remaining 3 corners. Make sure to open each airplane fold before going on to the next airplane fold.

7. After all four corners have been folded, open the square and gently press the space between each 2 airplane folds towards the centre, as depicted below.

8. Cup the paper in order to see the bell shape.

9. Apply double-sided tape on 2 opposing tips.

10. Carefully glue the bell.
