Crane - *Orizuru*
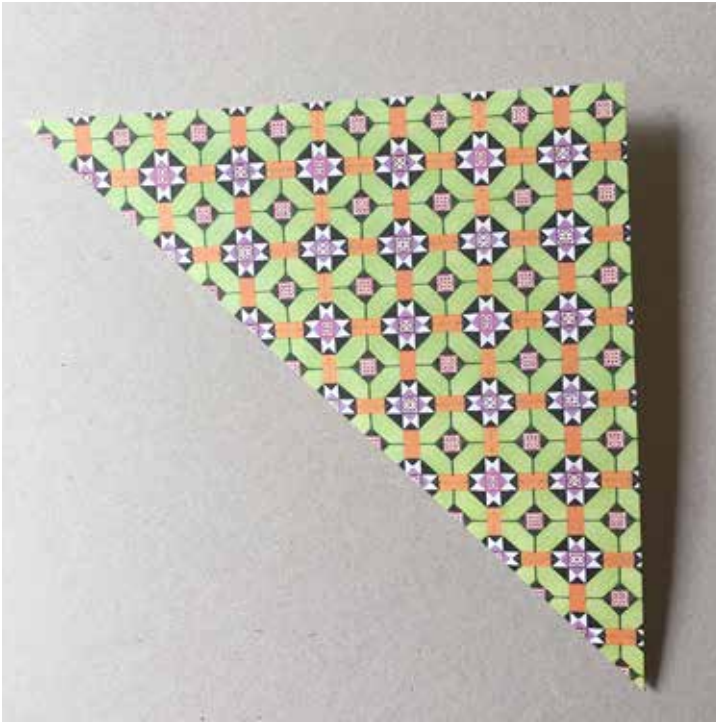

What do you need

1 sheet of Bonjardim origami paper of 15 cm x 15 cm.

How to make a crane

1. Fold a piece of square paper in half diagonally.

2. Fold it again in half.

3. Lift the top flap, pry open one of the sides and refold it into a square by squashing.

4. Turn the object over and repeat with the other side.

5. Fold the left and right flaps of the top layer towards the centre so that they meet the middle.

6. Turn the object over.

7. Repeat the previous step with the back flaps.

8. Fold the top triangle down and crease.

9. Open the top flaps and use the previous crease to lift the top layer of paper towards the top.

10. Turn the object over and repeat with the other side, so that you are left with a diamond shape object.

11. Fold the outer edges of both flaps so that they meet in the centre. Turn over and repeat on the reverse side.

12. Make marker creases on both flaps and release.

13. Open out each flap and make reverse folds along the creased lines made on the previous step.

14. Make a slant in one of the tips and make another reverse fold to make the cranes head.

15. Fold the wings down.
