

## Tree

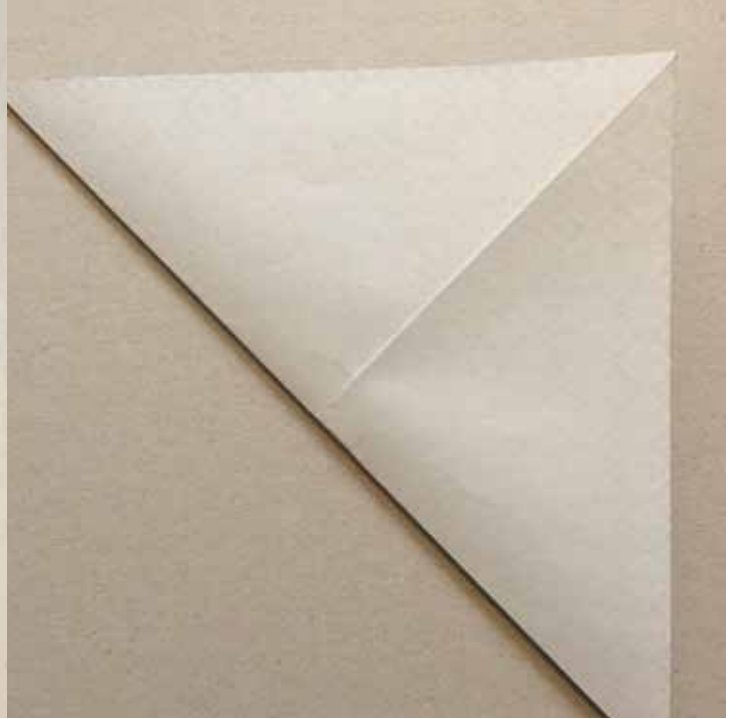

### What do you need

1 sheet of Bonjardim origami paper of 15 cm x 15 cm; scissors.

### How to make a tree

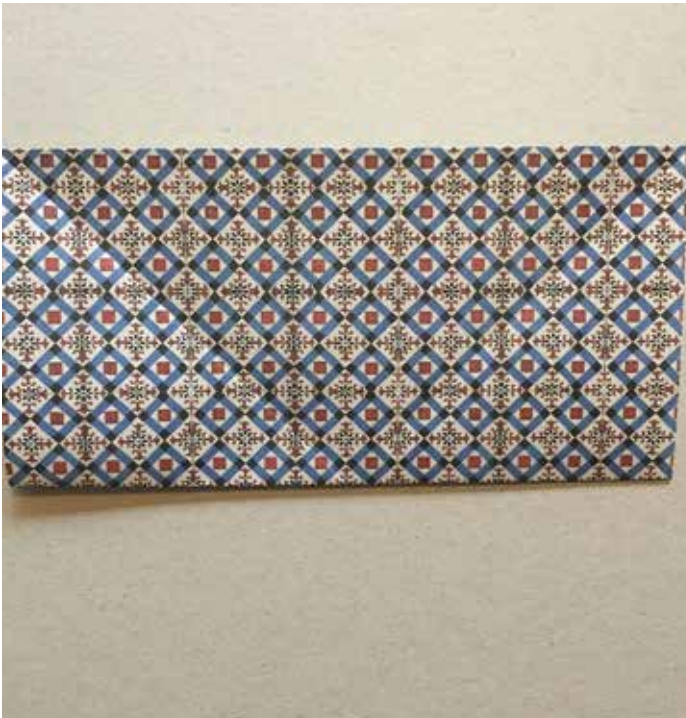

1. Fold a piece of square paper, printed side down, in half, diagonally.

2. Open. Fold the opposite diagonal, white side down.

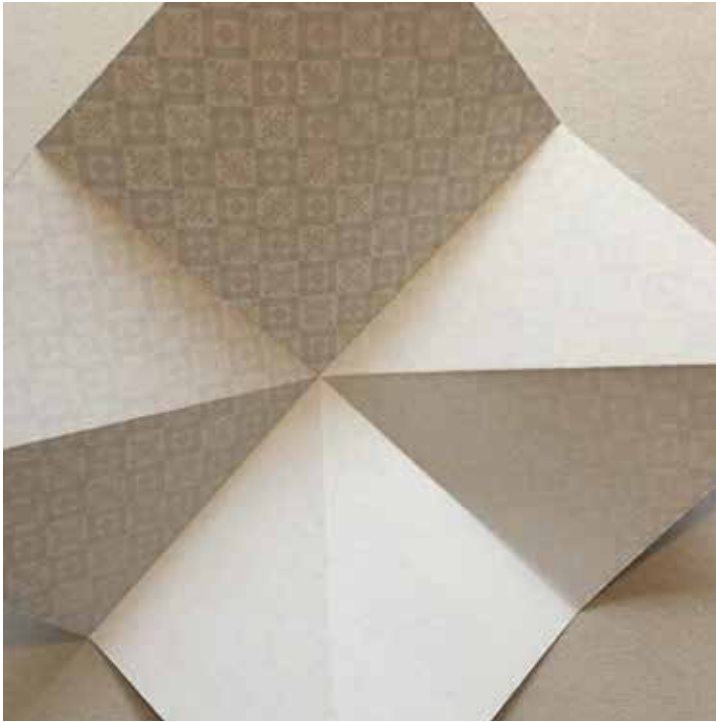

3. Unfold. Fold in half, printed side down, into a rectangle.

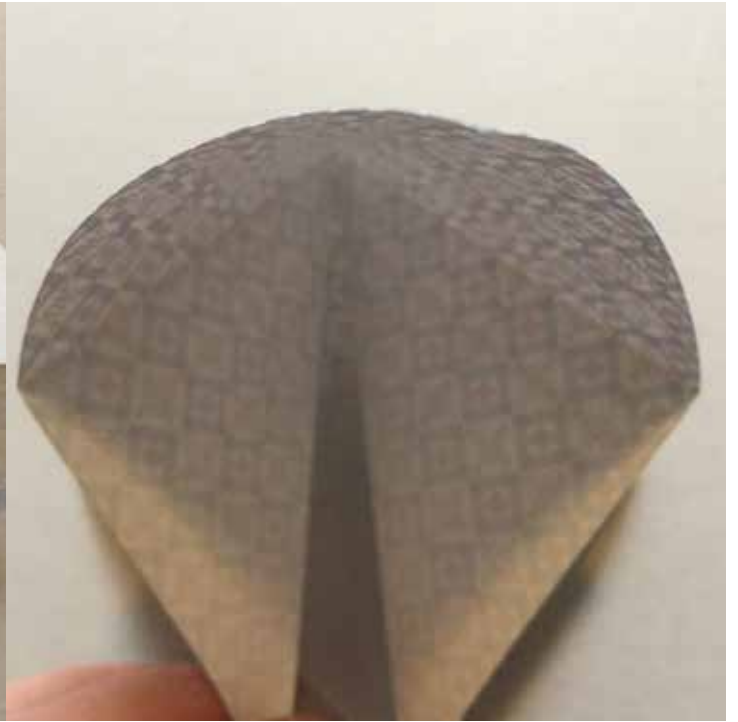

4. Fold it in half in the opposite direction.

5. Open.

6. Gently press the left and right sides towards the middle. Fold in order to have the four vertices meeting at the bottom, following the previously made creases.

7. Squash it towards you.

8. Turn it 180°.

9. Fold the sides towards the central axis.

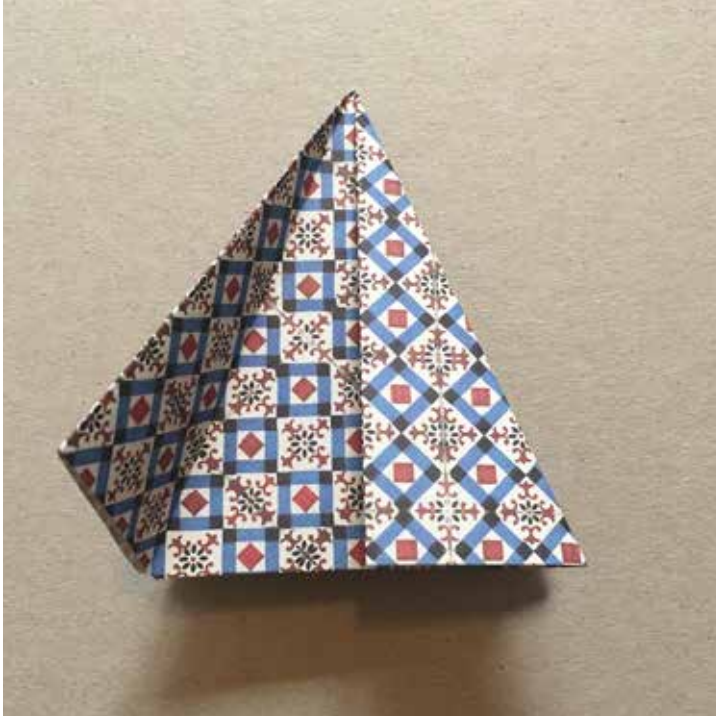

10. Turn the object over and repeat the folds on the other side.

11. Cut the top part off.

12. Rotate 180° and unfold the left flap.

13. Pry the left flap open and squash it.

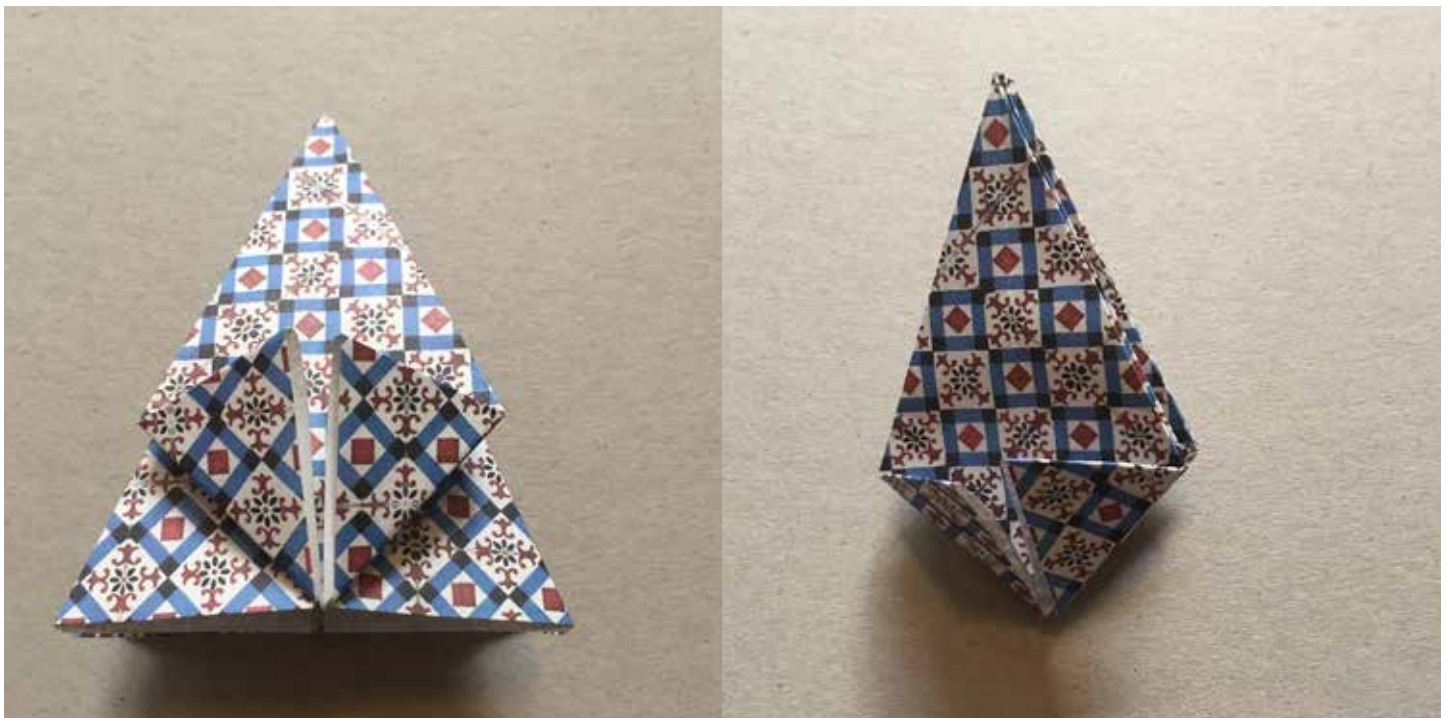

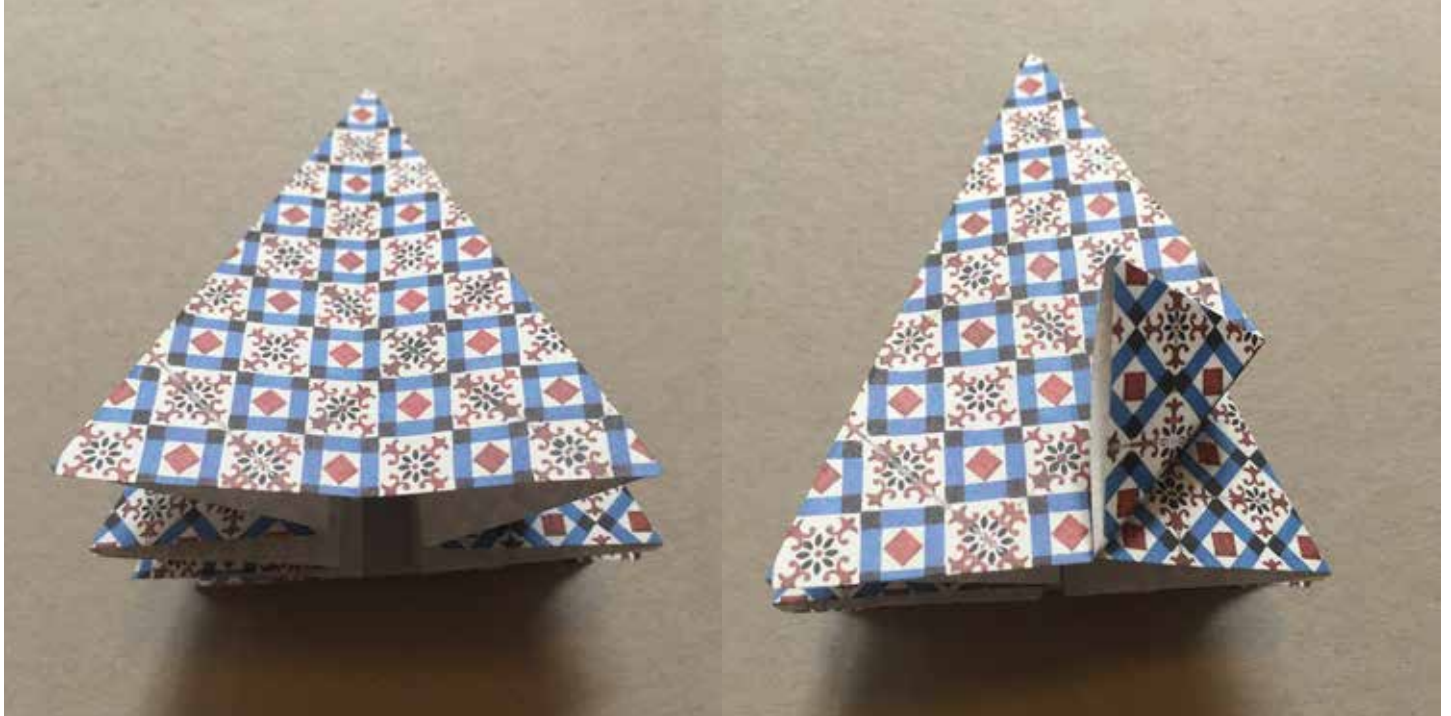

14. Repeat with the other flaps.

15. Turn over and repeat with the remainder 2 flaps.

16. Fold the corners up towards the central axis.

17. Unfold.

18. Turn the object over and fold the corners inwards.
